CORE SKILLS

- Backend Architecture & API Design
- Real-Time Systems (WebRTC, Sockets)
- Cross-Platform Mobile Development
- Database & Domain Modeling
- RBAC, Auth & Multi-Tenant Design
- Payment & Transaction Systems
- Team Leadership
- Effective Communication

TECHNICAL STACK

Backend — Node.js, NestJS, Express, TypeScript, REST, WebSockets, Socket.IO

Frontend — React, Next.js, Flutter, Dart

Databases — PostgreSQL, Prisma, MySQL, MongoDB

Real-Time — WebRTC, mediasoup, LiveKit

Infrastructure — Docker, Git, GitHub, GitLab, CI/CD, Firebase

Languages — Python, C++, Java, JavaScript

EDUCATION

B.Sc. Computer Science

Bahir Dar University

GPA: 3.78 / 4.0

LANGUAGES

English — Fluent

Amharic — Fluent

REFERENCE

Afomiya Andualem

+251 995 357 307

PROFILE

Backend-focused software engineer with a Computer Science degree and a strong foundation in scalable, user-centered applications. I build production-grade backend systems, cross-platform apps, and real-time SaaS platforms using modern architecture and clean domain design — spanning fintech-style wallets, video conferencing infrastructure, delivery logistics, and education technology.

PROFESSIONAL EXPERIENCE

Full-Stack Developer *IDUAR Software Company*

Mar 2025 – Current

- Scale a distributed CRM platform on the MERN stack, engineering secure RESTful APIs and high-performance React dashboards.
- Automate complex sales pipelines and data management workflows for enterprise clients.

Backend & Mobile App Developer *Dream More Company*

Sep 2024 – May 2025

- Instructed and developed Flutter, Express, REST API, and MongoDB solutions as a full-stack team lead.
- Delivered mobile and backend solutions from architecture through deployment.

Backend & Mobile App Developer *Wisdomwalk Application*

- Built the WisdomWalk mobile application using Flutter, Express.js, REST APIs, and MongoDB, with designated backend architecture.

Backend & Mobile App Developer *Team Work IT Solution*

Jun 2026 – Current

- Building a live-streaming mobile app with NestJS, handling real-time WebSocket connections and PostgreSQL query optimization for user sessions, stream metadata, and chat logs.

Freelance Full-Stack Developer *Mesa Gebeya Web App*

Jun 2025 – Dec 2025

- Delivered a full-stack e-commerce web application using the MERN stack for an independent client.

KEY PROJECTS

ServeLink — Education, Services & Earning Platform · Lead Backend/Full-Stack

STACK NestJS, TypeScript, Prisma, PostgreSQL, Flutter, Next.js, WebSockets, Firebase, Docker

Ethiopia-focused SaaS platform connecting students, teachers, freelancers, and civil servants through learning, service delivery, and a Learn → Do Task → Earn workflow.

- Designed a modular NestJS monolith with clean domain separation, transactional consistency, and role-based authorization across student, teacher, freelancer, and admin workflows.
- Architected community structures by school, woreda, zone, and region, plus service booking, 1:1/1:M learning sessions, and wallet/escrow-ready payment infrastructure.
- Built migration architecture for large existing government-user datasets, alongside badges, professions, and user verification systems.

MeetUp / Conference SaaS — *Real-Time Collaboration Platform · Backend/Full-Stack*

STACK *NestJS, PostgreSQL, Prisma, mediasoup, WebRTC, Socket.IO, Next.js, Docker*

- Implemented the core mediasoup SFU architecture: WebRTC media routing, producer/consumer lifecycle, and multi-participant audio/video.
- Built real-time screen sharing, host/co-host moderation, waiting rooms, and a collaborative whiteboard across a multi-tenant organization and subscription model.

Wisdom Walk — *Cross-Platform Mobile Application · Mobile/Full-Stack*

STACK *Flutter, Dart, REST APIs, Firebase*

- Built a feature-based Flutter architecture with structured content flows, state management, and reusable, accessible mobile components.

ADDITIONAL PROJECTS

CRM Platform — *Customer Relationship Management System · Full-Stack*

STACK *NestJS, Node.js, TypeScript, PostgreSQL, React, Next.js*

- Designed relational data models, backend modules, and authorization layers for lead

Task Management System — *Team Productivity & Workflow Platform · Backend/Full-Stack*

STACK *NestJS, TypeScript, PostgreSQL, Prisma, Next.js*

- Modeled projects, tasks, and team assignment with status/priority tracking, role-based permissions, and productivity dashboards.

CookieCMP — *Cookie Consent Management SaaS · Full-Stack*

STACK *Next.js, Node.js/NestJS, PostgreSQL, REST APIs, WordPress*

- Built a GDPR/CCPA-oriented consent platform with a cookie/banner builder, site scanning, audit logs, and Google Consent Mode v2 support.

Elfakal & Jawanda — *Travel & Tourism Landing Pages · Frontend Developer*

STACK *Next.js, React, TypeScript*

- Built responsive, conversion-focused travel landing pages with reusable components and SEO-friendly, performance-focused page structure.
